Witte Road Improvement Project (T-28b Phase 2)

Public Comment

November 7, 2019

Construction Impacts

Any time works for - full closure is fine.

SE 254th Place Intersection

PLEASE Do the roundabout! It helps us on SE 251st Place so we can go "right" to go left on Witte. If not we need a left turn lane @ SE 251st Place

SE 256th Street and 220th Avenue SE

Do a pocket park @ 220th Avenue.

Surface Water Design Love it.

General Over

Thank you for participating!!!

① Please extend the golf course not South 2 sections.

② Please address us being able to turn left onto Witte from SE 251st Pl by either adding left turn lanes or do the roundabout @ 254th.

③ Use consistant names for everything –
for example SE 251st connects to Witte.
Jenkins creek runs from the golf course across Witte and by my property.
The creek that runs along Witte is Cranmar (not Jenkins)

Construction Impacts

SE 254th Place Intersection

I Am happy that a round-a-bout is being considered. Please look at LONG-TERM impact of round-a-bout + ~~[illegible]~~ ~~[illegible]~~ Do it if it works out EVEN tho it adds 18 months. Would rather have project done right rather than fast. Also, would like to see more round-a-bouts between 254th + 272nd in the future. Round-A-bout is a neccessity!

SE 256th Street and 220th Avenue SE

Need to do what can be done to Straighten 256th. ~~[illegible]~~ Like idea of park at end of 220th when closed.

Surface Water Design

N/A

General

Thank you for participating!!!

#1 Round-a-bout @ 254th
Could take an addl 18 mos due to culvert.
Other rounda-bout betw. 254th & 272nd would be helpful

Construction Impacts

Traffic Mgmt Options: Order of Preference

1. Full Closure
2. Night time depending on cost impact
3. 7AM - 5pm
4. 9AM - 3PM

SE 254th Place Intersection

I like the Idea of a Traffic Circle though expensive and probably not practical from a timing perspective

SE 256th Street and 220th Avenue SE

short of the Traffic Circle, the design shown is an Attractive and practicle change for Cedar Downs.

Surface Water Design

General

Overall... A great process! Smaller groups, believeable candor, great visual aids. well done!

Thank you for participating!!!

Witte Road Improvement Project (T-28b Phase 2)

Public Comment

November 7, 2019

Construction Impacts

Please Do full closure During the Day. as someone who lives on 2WCC DR., we Don't want people cutting through at night. and Day time closure will be less noisy than night.

SE 254th Place Intersection

I would like to see the roundabout, I is worth the extra cost!! We need to slow down speeds on with road. Plus this will increase safty.

SE 256th Street and 220th Avenue SE

Public Comment

November 7, 2019

Construction Impacts

SE 254th Place Intersection

The left turn lanes are an improvement but only addresses 50% of the problem. Vehicles exiting Cedar Downs at peak traffic still unable to turn left. Roundabout solves all problems and would be a waste of funds to split into two projects.

~~**SE 256th Street and 220th Avenue SE**~~ IMPORTANT: Roundabout also forces traffic to slow down on Witte Rd!!

Surface Water Design

Witte Road Improvement Project (T-28b Phase 2)

Public Comment

November 7, 2019

Construction Impacts

#4 full closure and finish faster

SE 254th Place Intersection

No problems.

SE 256th Street and 220th Avenue SE

It would seem worth the effort & $s to make a round about now, rather than improve increased traffic flow as the area grows in the future.

Surface Water Design

It looks good.

General

Thank you for participating!!!

The City of
MAPLE VALLEY

Witte Road Improvement Project (T-28b Phase 2)

Public Comment

November 7, 2019

Construction Impacts

If full closure is 2 weeks, I vote full closure. If its several months, I vote 9am-3pm single lane.

SE 254th Place Intersection

I wish it could be moved South to connect w/ 220th and the road from the golf course. If you're going to spend the money, connect all 3 roads.

SE 256th Street and 220th Avenue SE

Add a left turn lane to 256th. (Widen 256th to accomodate it as a 3rd lane.) The closure of 220th takes away our left turn down at the bottom of the hill.

Surface Water Design

Planting matrix, how will it affect sight distance from 256th and 254th? Keep it low-growing.

General

Thank you for participating!!!

The City of
MAPLE VALLEY

Witte Road Improvement Project (T-28b Phase 2)

Public Comment

November 7, 2019

Construction Impacts

Preferred option is #4 - Full Closure (w/daytime work)

SE 254th Place Intersection

NO roundabout at 254th! Too expensive, negative effect on fish habitat, would decimate Cedar Downs and golf course entrances.

SE 256th Street and 220th Avenue SE

Please do whatever is possible to realign SE 256th St. - but do not reconsider the decision to close 220th

Surface Water Design

Good plan

Witte Road Improvement Project (T-28b Phase 2)

Public Comment

November 7, 2019

Construction Impacts

We're on SE 257st so as long as we can get in/out at least one direction, our preference is to work 24/7 to get the get the work done ASAP.

SE 254th Place Intersection

Strong proponant of the traffic circle concept. This option would improve the safety for vehicles turning into and out of SE 251st.

SE 256th Street and 220th Avenue SE

Surface Water Design

Really glad you're putting in a fish ladder for Jenkins Creek.

General

We need street lights all along Witte.

Thank you for participating!!!

Witte Road Improvement Project (T-28b Phase 2)

Public Comment

November 7, 2019

Construction Impacts

No Night Construction
Signage needed for Reroutes on 169
School times have big impact on Traffic here
Have we done an intersection level of Service for 254th

SE 254th Place Intersection

If full closure, what is expected increase in emergency response time. Has Fire Dept been asked?

When Roundabout goes in 254th, open 220th inbound to 220th

SE 256th Street and 220th Avenue SE

Straighten out 256th
Leave open 220th inbound to 220th

Surface Water Design

Sounds good

General

Thank you for participating!!!

The City of
MAPLE VALLEY

Witte Road Improvement Project (T-28b Phase 2)

Public Comment

November 7, 2019

Construction Impacts

Lake Lucerne residents have only one way in/out off Witte Road, with no alternative routes. This must be accomodated.

SE 254th Place Intersection

Roundabout will probably be much too expensive solution.

SE 256th Street and 220th Avenue SE

SE 256th ST is more of an "S" than the drawings indicate. Needs to be fixed in any construction project

Surface Water Design

I like the South Fork Jenkins Creek restoration project

General

I am grateful for new sidewalks and bike lanes. I will use them regularly and connected with SE 256th.

Thank you for participating!!!

The City of
MAPLE VALLEY

Witte Road Improvement Project (T-28b Phase 2)

Public Comment

November 7, 2019

Construction Impacts

Full Closure with detour will have a major impact on residents in Lake Lucerne area and Cedar Downs.

SE 254th Place Intersection

Round about is much better solution than just left hand ~~lan~~ turns lanes on Witte Rd.
We should get more information about the roundabout before we make any decision to close 220th !!!

SE 256th Street and 220th Avenue SE

256th has to be straightened. It is dangerous as it is constructed now. The drain should be checked several times a year & cleaned out because it fills up with dirt & sand & won't drain.

Surface Water Design

Hopefully we can rehabilitate all of the fish passages.

General

Thank you for participating!!!

The City of
MAPLE VALLEY

Witte Road Improvement Project (T-28b Phase 2)

Public Comment

November 7, 2019

Construction Impacts

TRAFFIC MGMT – FULL CLOSURE W/ DETOUR ON COUNTRY CLUB DR SEEMS LIKE THE MOST EFFICIENT OPTION:
A. NO ALTERNATING SINGLE LANE
B. BETTER ACCESS FOR CONST EQPT – SHOULD MAKE THE CONSTRUCTION ACTIVITY MORE EFFICIENT.

SE 254th Place Intersection

THE ROUND ABOUT MAKES GREAT SENSE. WE LIVE ON LK LUCERNE, AND EVEN WITH THE REVISION TO 256th COMPLETED, WE STRUGGLE TO FIND A GAP IN TRAFFIC TO MAKE A LEFT TURN ONTO WITTE ROAD.

SE 256th Street and 220th Avenue SE

CLOSING 220th MAKES GREAT SENSE. THERE IS NOT ENOUGH DISTANCE BETWEEN 254th & 220th TO FACILITATE TRAFFIC ENTERING WITTE ROAD
THE YIELD SIGN @ 256/220th MAKES NO SENSE – YIELD TO WHAT? – ONLY 5-6 HOUSES NORTH OF THAT INTERSECTION, NEED A SMOOTH, LARGE RADIUS TURN FROM 256th TO 220th

Surface Water Design

General

Thank you for participating!!!

The City of
MAPLE VALLEY

Witte Road Improvement Project (T-28b Phase 2)

Public Comment

November 7, 2019

Construction Impacts

Most desirable would be what reduces time of project. I believe we can all endure daytime closures to make the project complete sooner

SE 254th Place Intersection

60% Plan is EXCELLENT! But, the Roundabout will in my opinion be way to expensive, and will destroy the signature entrance to Cedar Downs. Pedestrians on Golf Course side of road will not use crosswalk. Elevation issues with roundabout as well. BAD IDEA for this location. CDHA may refuse property purchase.

SE 256th Street and 220th Avenue SE

Anything to help in re-alignment of 256th and 220th would be great.

Surface Water Design

Excellent plans!!! So glad to see that the City of Maple Valley is going to preserve and protect the Salmon habitat and do our best as a community to protect waterways downstream.

General

Thank you for participating!!!
